CASE STUDY 02

Teacher Capacity Building through Distance Education ? AIOU

PROBLEM

B.Ed and M.Ed learners enrolled through open distance learning were strong on theory but under-prepared for classroom practice; workshop sessions were inconsistent across centres and assessment of practical competence lacked a shared standard.

ACTION

Rebuilt the workshop sequence around demonstration, micro-teaching and structured feedback; produced session plans and reading packs for tutors; introduced common rubrics for assessing practical work and mentored new tutors on facilitation technique.

OUTCOME

Consistent workshop quality across centres, clearer evidence of practical competence in learner portfolios, and a tutor-development loop that continues to serve new cohorts of distance-learning educators.

ROLE

Workshop Coordinator & Tutor, Allama Iqbal Open University (2007?present); assessment of B.Ed / M.Ed / M.A Education coursework.
